A Companion to Global Queenship

edited by Elena Woodacre

DESCRIPTION:
This collection expands previous regional and individual studies of queenship and female political agency in order to engage in a comparative study of premodern female rule on a global scale. While the field of queenship studies and examinations of gender and power have been flourishing, the literature has tended to be dominated by studies of European royalty. This volume aims to embrace and develop the trend towards an increasingly global outlook for the field of queenship studies.

TABLE OF CONTENTS:
